Making a Project  
Accessible

# What Is This Presentation About?

In this presentation you learn to:

- ▶ Define accessibility as it pertains to Bible translation
- ▶ Make your translation accessible to others

*The Android robot is reproduced or modified from work created and shared by Google and used according to terms described in the Creative Commons 3.0 Attribution License.*

# What Is Accessibility?

It's useless to have Bible translations that just sit on a shelf (or on someone's computer)!

# What Is Accessibility?

It's useless to have Bible translations that just sit on a shelf (or on someone's computer)!

We want the Bible to get into the hands of the people who so desperately need it.

# What Is Accessibility?

- ▶ Accessibility is making your work available to others in a format they can use.

- ▶ In what format?
- Whatever the church wants!

## PRINTED COPIES

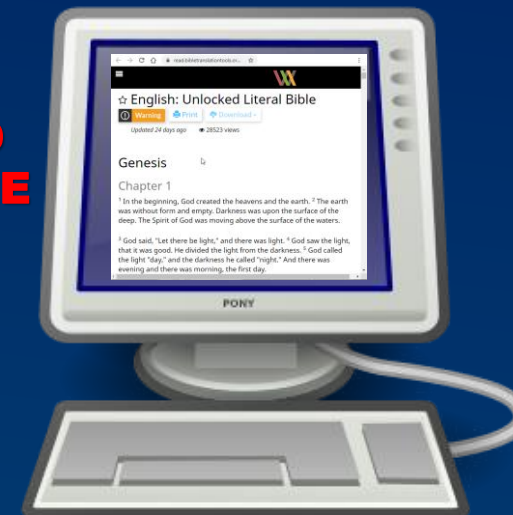

## FANCY BIBLES

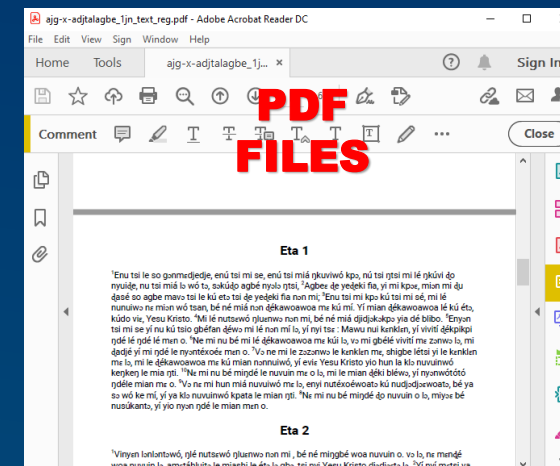

## TABLET/PHONE

## READ ONLINE

## PDF FILES

# How Do I Make My Work Accessible?

- ▶ Upload your project to the WA content server (WACS) as often as you want to create a backup of your work (see [Uploading or Exporting Your Work](#)).
- ▶ Uploaded project is available online to anyone at the URL:  
[https://content.bibletranslationtools.org/username/project\\_code](https://content.bibletranslationtools.org/username/project_code)
  - ▶ For user-friendly content, click **See in Reader**
  - ▶ Or use the URL  
[https://read.bibletranslationtools.org/username/project\\_code](https://read.bibletranslationtools.org/username/project_code).

# Viewing Accessible Projects

From the content server,  
anyone can:

- ▶ See the web version of your project
- ▶ Download a USFM file of your project
- ▶ Print your translation

# Viewing Translations on **bibleineverylanguage.org**

- ▶ Many translations are available on the Bible in Every Language website.
- ▶ Talk to your Wycliffe Associates contact to make your translation visible there.

The screenshot shows the website **bibleineverylanguage.org** with the URL `bibleineverylanguage.org/translations/?lang=en` in the browser address bar. The page features the Wycliffe Associates logo and navigation links: Processes, Resources, Translations (highlighted), Tools, and Support. A language dropdown menu shows 'English' with a downward arrow. The main heading is 'Translations'.

On the left, under 'Languages', there is a search bar 'Search languages or codes...' and a dropdown menu 'All Texts and Resources'. Below this is a list of languages with their codes:

Language	Code
Abadi	kbt
Abau	aaü
Abau	aaü
Abuhaina	tbg-x-abuhaina
Abui	abü
Abuhaina	tbg-x-abuhaina

On the right, under 'English', there is a section for 'Unlocked Literal Bible (ULB)' with a green checkmark icon. Below this are two buttons: 'Read on Web' and 'Download'. A red arrow points to the 'Read on Web' button. Below these buttons are two expandable sections: 'Old Testament' and 'New Testament'. Under 'New Testament', there are two items: 'Matthew' and 'Mark', each with a 'usfm' button next to it.

# What Did You Learn?

In this presentation you learned to:

- ▶ Define accessibility as it pertains to Bible translation
- ▶ Make your translation accessible to others
