Advanced

- **Developer Tools**– opens developer tools, which you should not do unless directed by a translationStudio support technician

Changing the Translation Font Size

- It's a good thing to do if using language with non-Roman characters.
- To change the translation font size in Settings:
 1. Click **Target Translation Font Size**.
 2. Select the desired font size and click **CONFIRM**.
 3. The new font size is displayed.

What Did You Learn?

In this presentation you learned to:

- Open the Options menu
