Uploading/Exporting a Project

- tS saves work to your device every 5 min. by default (can change in Settings)
- Good idea to create an offline backup in case:
 - Your files get corrupted
 - Your device crashes
- Enables you to:
 - Share your work with others
 - Work on a different device by importing to any device that has translationStudio installed
- tS provides several ways to back up and/or share your work

Options for Uploading/Exporting a Project

- Options menu (3 dot icon) from Project Screen: Upload/Export

Upload to Door43 server (requires internet connection and login to Door43 account)

Save a USFM file on your device (can be imported)

Save a PDF file on your device

Save project on your device with `tstudio` extension

Allow another tablet to import

Send using Bluetooth, email, Google drive, or other app on your device

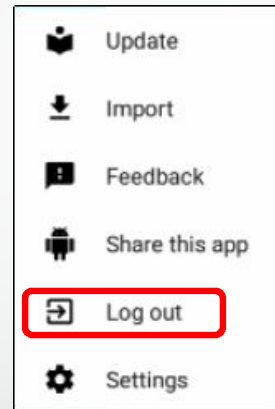

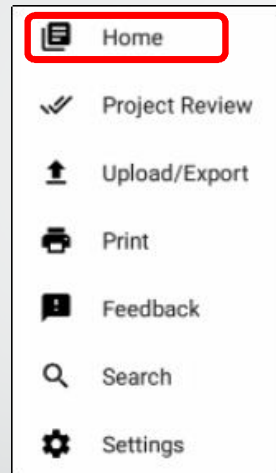

Exporting/Importing a Project

1. Log in to Door43.
2. Review your project and add another contributor.
3. Export your project to Door43.
4. View the project on Door43.
5. Delete your project from your device (to simulate loss of the file).
6. Import your project from Door43.
