

# translationStudio for Android

Starting a New Project

# What Is This Presentation About?

In this presentation you learn to:

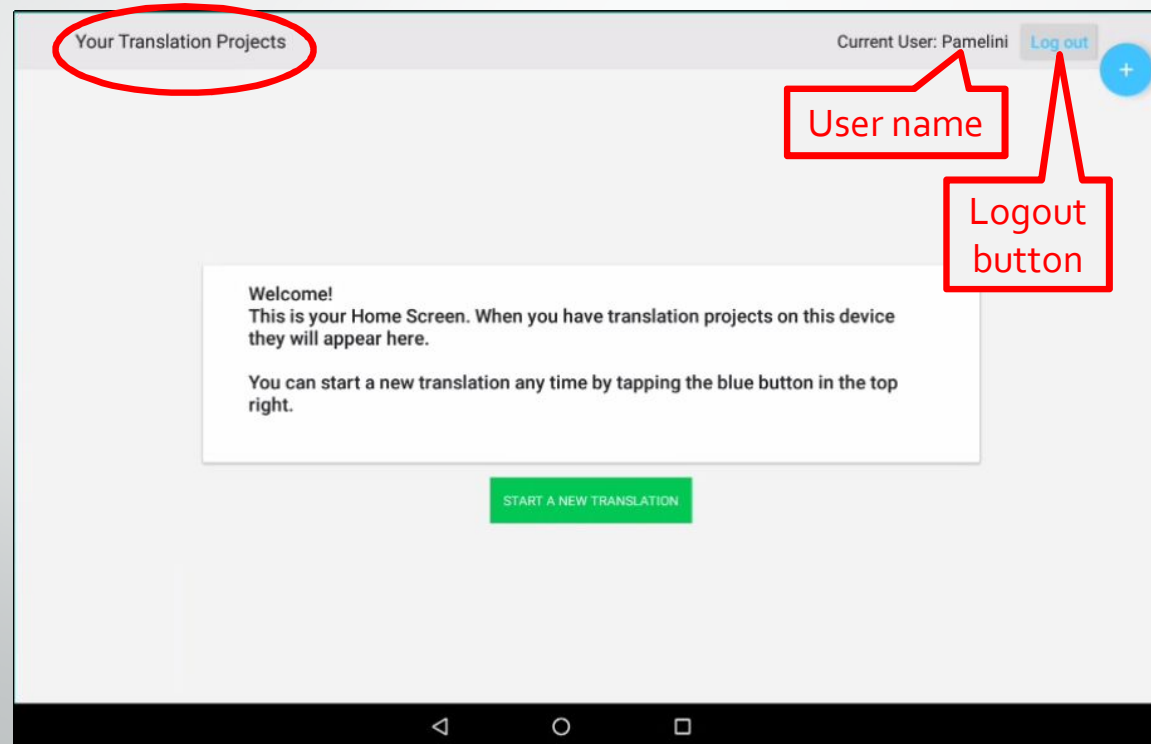

- Explain what a translationStudio project is
- Create a new translation project

*The Android robot is reproduced or modified from work created and shared by Google and used according to terms described in the Creative Commons 3.0 Attribution License.*

# There Are Two Types of Screens

1. *TranslationStudio opens to display the first type, the Home screen.*

# What Is a Project?

- A project is a workspace to translate a specific portion of Scripture or Bible story into a target language
- 2 elements:
  1. Target language: What language am I translating **INTO**?
  2. Project category: What will I be translating?
    - Old or New Testament? Which book?
    - Open Bible Stories?
- After creating a project, you must specify source text: What will I use to translate **FROM**?
  - Can be English or a gateway language, ULB or UDB
  - Can use multiple source texts

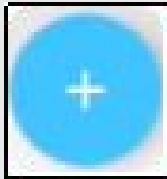

# Steps to Create a New Project

1. Tap the icon to start a new project
2. Choose the target language (language you're translating *into*)  
Suggestions: English Demo 1 or Demo 2
3. Choose the project category (what you will translate)  
Suggestion: Bible:NT → James
4. Specify a source text (language and text for the source translation)  
Suggestion: English (en) – Unlocked Literal Bible

These steps are shown in the next few slides.

# Starting a Project

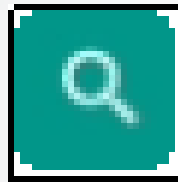

1. Tap the blue plus or the green button

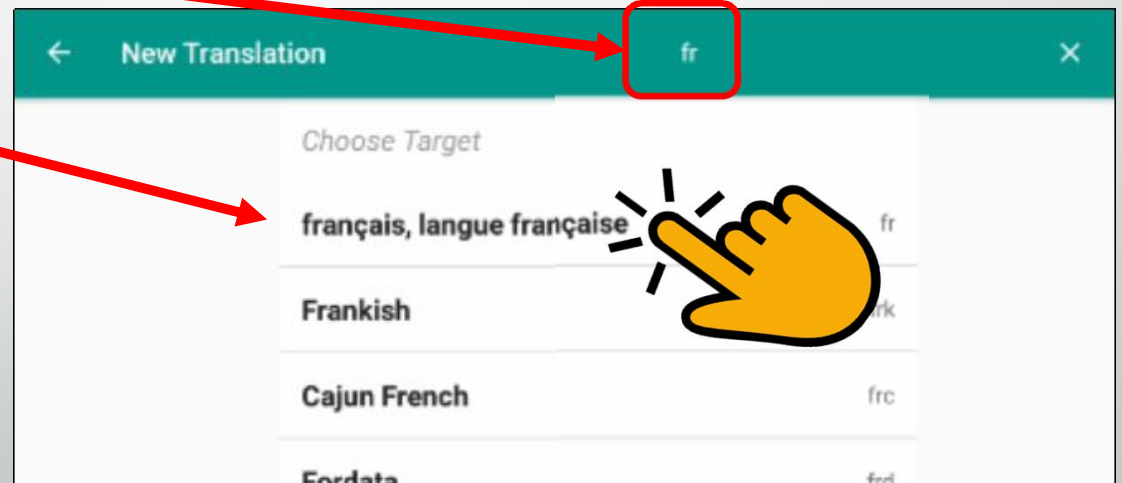

# Starting a Project

## 2. Choose target language:

- Tap magnifying glass
- Search for language, such as "fr"
- Tap desired target language

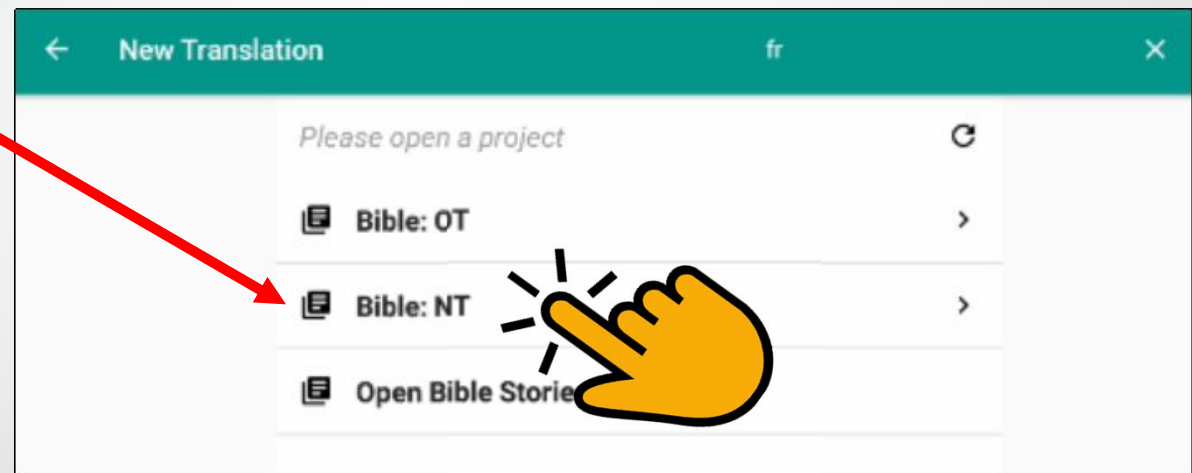

Language you're translating *into*

# Starting a Project

## 3. Choose project category (what to translate):

- Tap **Bible:NT**

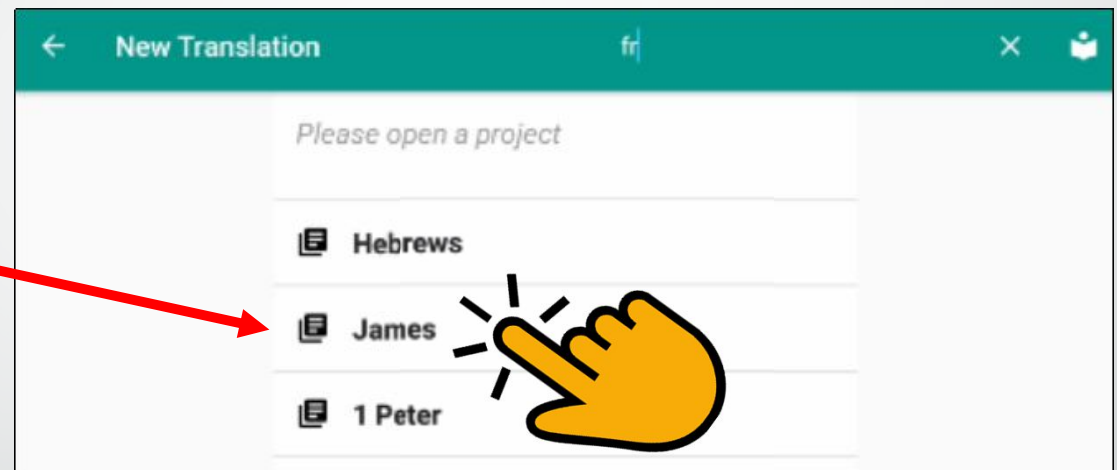

# Starting a Project

## 3. Choose project category (what to translate):

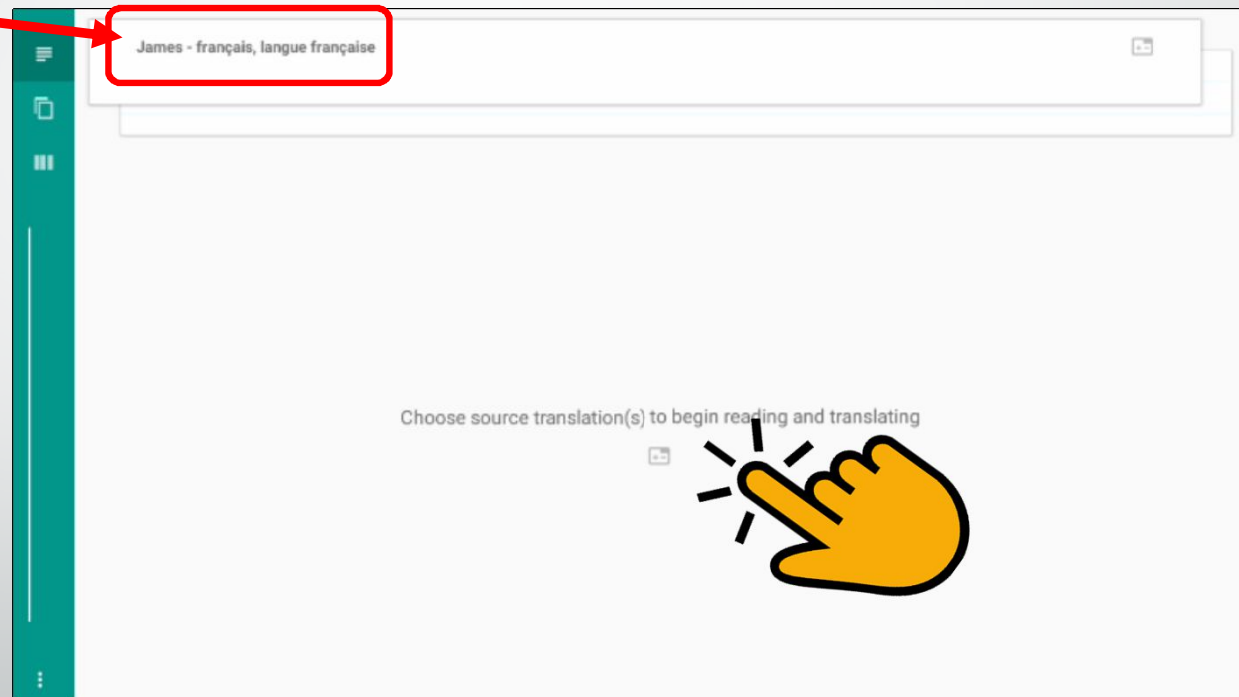

- Tap **Bible:NT**
- **Swipe up to scroll**
- **Tap James**

# Starting a Project

## 4. Choose one or more source texts:

- Project is created:
- Can't work until a source text is specified – tap anywhere in bottom part of screen.

# Starting a Project

## 4. Choose one or more source texts:

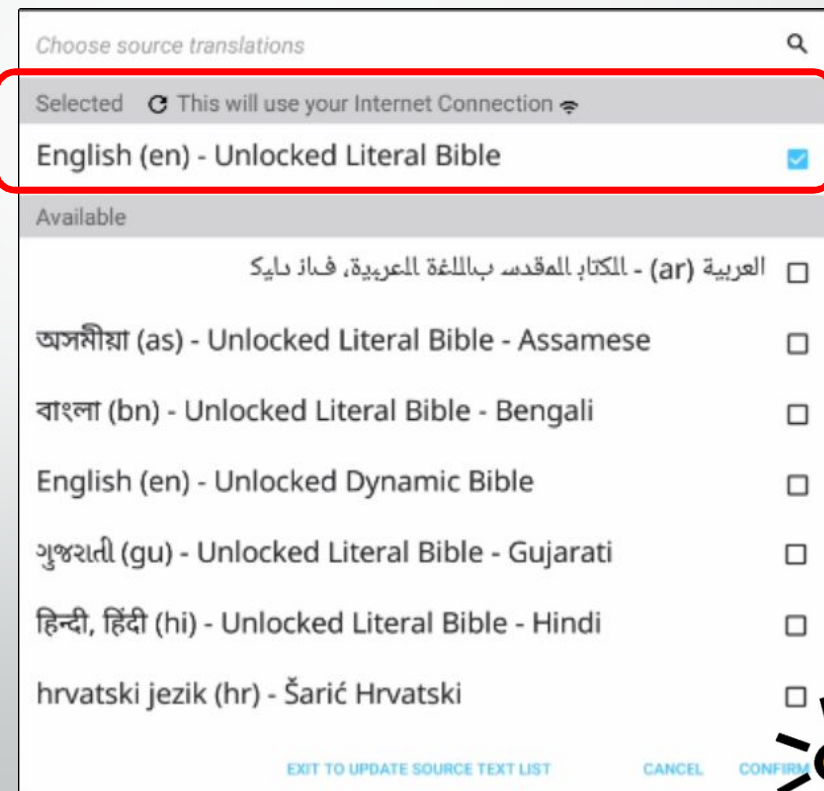

- Project is created:
- Can't work until a source text is specified – tap anywhere in bottom part of screen.
- Select one or more source texts (tap **English ULB**)

# Starting a Project

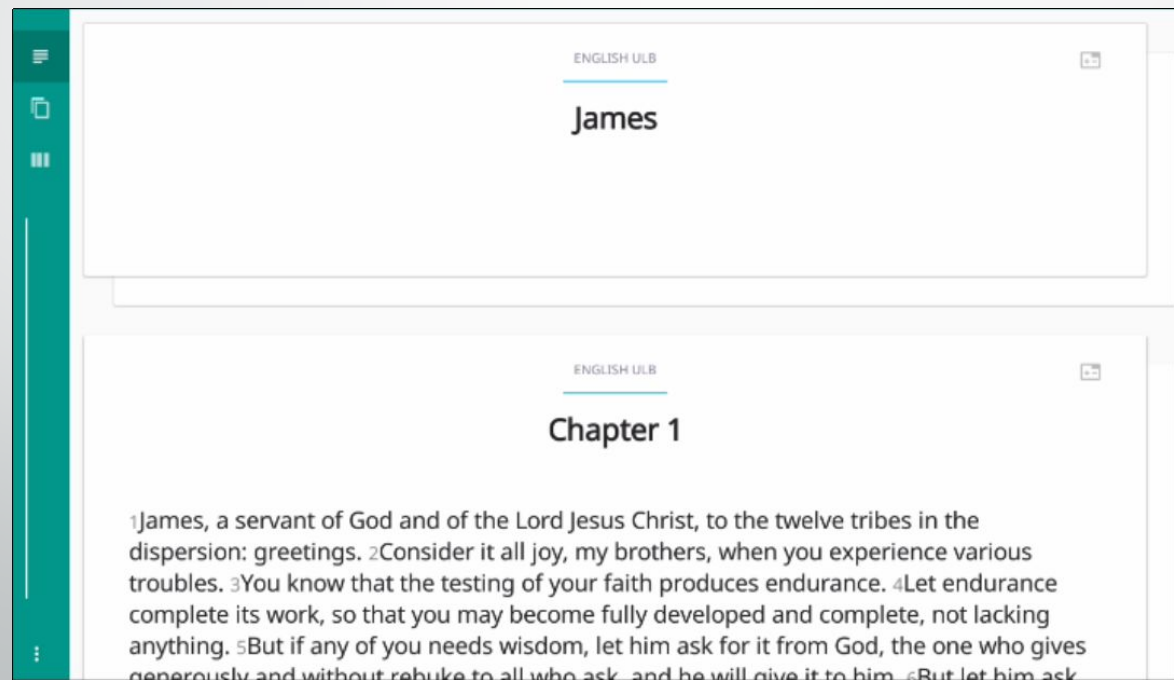

## 4. Choose one or more source texts:

- Project is created:
- Can't work until a source text is specified – tap anywhere in bottom part of screen.
- Select one or more source texts (tap **English ULB**)
- Tap **Confirm**.

## Second Type of Screen

2. The *Project* screen opens: Your working area for a single project. You are now ready to begin translating.

# What Did You Learn?

In this presentation you learned to:

- Explain what a translationStudio project is
- Create a new translation project
